Professional Summary

Frontend Developer with a strong foundation in HTML, CSS, JavaScript, and React. Experienced in building responsive web applications, integrating APIs, managing application state, and deploying projects using GitHub Pages and Netlify. Passionate about creating clean, user-friendly interfaces and continuously improving through hands-on projects.

Technical Skills

HTML5, CSS3, JavaScript (ES6+), React, Git, GitHub, GitHub Pages, Netlify, Responsive Design, DOM Manipulation, Fetch API, Local Storage.

Projects

SpendWise – Finance Tracker

Built a personal finance tracker using HTML, CSS, and JavaScript. Implemented Local Storage, automatic income, expense and balance calculations, and a responsive interface.

Movie Finder

Built a responsive movie search application using Fetch API to retrieve and display movie information from an external API.

Today – React Todo App

Developed a React todo application using reusable components, useState, useEffect, and Local Storage.

Education

Bachelor of Science (B.Sc.) in Psychology

University of Cape Coast

Completed: May 2016
